Tips for a Healthy Diet

Nowadays, many people are trying to eat a healthier **diet**. Eating healthy **meals** is not hard to do. Here are some easy ways to eat better:

- Take the time to **prepare** delicious **dishes** that are also good for you. Food you make at home is usually healthier than food from a restaurant or cafeteria.
- Eat dishes with healthy **ingredients**, such as vegetables, and ones without much sugar or salt.

In many places, fresh food is **available** at **farmers'** markets. Farmers bring a **variety** of **crops** to these markets, including many kinds of fruits and vegetables.

Although most of your meals should be healthy, it is fine to enjoy some ice cream or cookies on **special** occasions like your birthday.

B Write each word in **blue** next to the correct meaning.

1. diet the kind of food you usually eat
2. _____ to make something ready
3. _____ better or more important than other things
4. _____ breakfast, lunch, and dinner

6. _____ plants grown by farmers for food
7. _____ foods that are cooked in certain ways

10. _____ types of food that are combined to make a dish

WORD FOCUS

Use the -s ending with the third person singular (he / she / it).

Grammar (See Grammar Reference p. 146)

The Simple Present vs. The Present Continuous; Stative Verbs	
Use the simple present to talk about habits and things that are generally true.	Fresh vegetables are always available at the market. I normally don't eat eggs for breakfast. Do you follow a special diet?
Use the present continuous to talk about actions and events that are happening now.	I am watching and learning how to make the cake. My father isn't preparing a special dish for tonight's dinner. Is she celebrating her birthday now?
Stative verbs (<i>think, taste, have, smell...</i>) express a state rather than an action, so they are not usually used in continuous tenses. When used in the continuous tenses, these verbs express the meaning of an action	I think that coffee is great. (<i>a state</i>) The coffee tastes really bitter. (<i>a state</i>) I am thinking about Jane's birthday party last night. (<i>an action</i>) The chef is tasting the chicken soup. (<i>an action</i>)

The Paleo Diet: Natural and Healthy?

Bản sách mẫu

Modern supermarkets give us many choices. There are colorful fruits and vegetables, fresh fish and meat, many kinds of bread, eggs, yogurt, and cheese. But at the same time, people in the modern world are **experiencing** health problems. Could the food we eat be causing some of these problems?

One explanation for modern health problems is that they began when human beings became farmers about 12,000 years ago. Around that time, people started growing and eating crops, such as wheat and rice. Some people believe that returning to an earlier way of eating—a “paleo diet” that includes only meat, fish, and fruits and vegetables—might be a solution to our modern health problems.

A paleo diet is special because it doesn't include grains, dairy foods, or legumes, such as peanuts or beans. For many of us, it is not possible to prepare our favorite dishes without these ingredients. But people who follow a paleo diet only eat foods people ate before farming began. They believe this is a more natural and healthier way to eat.

For Dr. Peter Ungar, the **truth** is not so simple. In human history, people have eaten a wide variety of foods. Early human beings lived in different places with different climates, so many kinds of food were available to our **ancestors** even before farming began. Dr. Ungar says our **ability** to eat in many different ways and to be healthy whether we live in the Arctic or in the tropics is the important thing. One thing is certain, though: If you do decide to try a paleo diet, remember that your meals might actually have less variety than the meals of your early ancestors.

to experience (v) to have something happen to you
truth (n) facts, not things that are imagined or invented
ancestors (n) parents, grandparents, and other people who lived before you
ability (n) quality or skill that makes it possible for you to do something

Some foods common in a paleo diet.

You can have a picnic at a park or at the beach. It's very informal, and you might eat sandwiches or salads and fruit.

Communication

A Discuss the questions in a small group.

1. Many social events include food. What do you know about each social event in the box below?
2. Where does it take place?
3. How many people are there?
4. What do they usually eat and drink?

a birthday party	a dinner party	a family dinner
lunch with coworkers	an outdoor picnic	a wedding dinner or feast

1. Who did you meet?
2. What happened?

4. Did you enjoy the event? Why / Why not?

Writing

C Read the information in the box. Then discuss the questions below.

WRITING SKILLS: Main Ideas and Supporting Details

Main Ideas

When you are reading, it is important to look for the writer's main ideas. These are the important points or claims the writer wants to make. For example:

For Peter Ungar, the truth is not so simple.

One explanation for modern health problems is that they began when humans became farmers thousands of years ago.

Supporting Details

After you read a main idea, it is helpful to look for details—information that helps you understand the main idea or believe the writer's claim. For example:

... in human history, people have eaten a wide variety of foods.

Many kinds of food were available to our ancestors.

1. What main idea do the details in the box above support?
2. How do the details help you understand or believe that main idea?

WORD FOCUS

claim something that a person says and believes is true

Plant-based lasagna is a healthy vegetarian meal.

- D** Read the paragraph from an Internet food blog. Notice the main idea (underlined) and the details that support the main idea.

There are many good dishes to serve at a dinner party, but I recommend baked lasagna. It is great for parties because it is a dish you can make in advance. For example, if you have time the night before the party, you can make the lasagna and put it in the refrigerator until the next day. In addition, everyone seems to like lasagna. If your guests eat meat, you can make a meat and cheese lasagna, but if your guests are **vegetarian**, a vegetable lasagna is just as delicious. A good tomato sauce, together with the pasta and other ingredients, is really all you need. Lasagna can even be **vegan** if you can find good vegan “cheese” at the store. Finally, it’s a good party food because you don’t need to prepare a lot of other dishes when you serve lasagna. A simple green salad and some Italian bread go well with lasagna. And maybe some dessert—after all, it is a party!

vegetarian (n) a person who does not eat meat, fish, or chicken
vegan (adj) containing no animal foods, including milk, cheese, or eggs

REAL LANGUAGE

Quotation marks can tell us a word is being used in an uncommon way. For example, vegan “cheese” is not made from milk.

- E** Read the paragraph again and complete the outline below.

Main Idea: I recommend baked lasagna for a dinner party.

Supporting Details: 1. You can make lasagna in advance.

2. _____

3. _____

- F** In a small group, brainstorm ideas for these possible writing topics. What ideas do you have about each topic? What details might you include?

Write about a social event you attended recently.

Write about a bad meal that you had.

Write about people’s eating habits in your country or culture.

WRITING NOTE

You can use **because** to introduce reasons. Notice the two places the blog writer uses **because**.

GOAL CHECK

Give Details to Support Your Ideas

1. Choose ONE topic from the list above and write a paragraph (150–180 words) in your notebook. Your paragraph should have a main idea near the beginning and three or four supporting details.
2. In pairs, discuss the topic you chose.

Look at the photo and answer the questions:

- 1** How are the students talking to each other?
- 2** Besides language, what else do people use to express their feelings?

Three deaf students chat in a university classroom.

UNIT 2 GOALS

- A. Talk about Yourself
- B. Make Small Talk with New People
- C. Start a Conversation
- D. Discuss Endangered Languages
- E. Give Examples

A GOAL Talk about Yourself

Vocabulary

A Read.

Selfies are an important part of how we talk about ourselves now!

Every culture around the world has different **customs** and different ways of communicating. So when you learn a language, you learn more than words.

People use language to **communicate** many different things. Greetings, such as "Hello" or "How are you?" show that we are friendly or **polite**. We also use language to **connect** with each other. Using the right words can show our family members that we love them, for example. We might also become friends with people who we speak to every day. Another good way to connect with people is by talking about our personal **experiences**.

In some cultures, it is **common** to ask questions when you meet someone for the first time. You might ask a new neighbor, "Have you recently moved to this city?" This kind of conversation can increase feelings of trust between people. In other cultures, though, asking this kind of question could make people uncomfortable. Once you have learned the rules of a language, you can communicate more easily and **avoid** communication problems.

B Circle the correct word or phrase. You may use a dictionary to help you.

1. A **custom** is something that *few* / *most* people in a certain place or culture do.
2. When you **communicate** with someone, you share *money* / *information* with them.
3. A **polite** person has good manners and is not *rude* / *nice* to other people.
4. When you **connect** with other people, you feel *closer* / *not as close* to them.
5. Your **experiences** are things that you do or that *return* / *happen* to you.
6. If something happens *often* / *rarely*, it is **common**.
7. Most people **avoid** things they *like* / *don't like*.

C In pairs, ask and answer two of the following questions.

1. What's a popular custom in your country?
2. How do you often communicate or connect with others?
3. What was the best experience of your childhood?
4. What topics do you often avoid when talking to your friends or family? Why?

WORD FOCUS

Remember that *has* is pronounced with a /z/ sound.

*She **has** already watched that movie, so she **doesn't** want to see it again.*

Communication

F Read the text.

English speakers often make small talk when they meet someone new. In general, small talk should make people feel more comfortable—not less comfortable—so the topics should not be very personal. For example, “Which department do you work in?” is a good question at work, but “How much money do you make?” is too personal.

G Circle the topics that are good for small talk when you meet someone for the first time. Then add two more ideas. Compare your ideas in pairs.

family money religion school sports work _____

H In pairs, read the situations. Choose a question to ask for each situation. Then, write and practice brief conversations based on the situations.

- a. Are you new in this city? b. Are you making a good salary here?

Situation 2 Andrei is from Russia. He talks to Eduardo at the International Students' Club. It's Eduardo's first meeting.

I With your partner, discuss the “incorrect” answers from H. Why do you think those questions might make someone feel uncomfortable? Do you think it's the same in Vietnamese culture?

GOAL CHECK

Make Small Talk with New People

- In pairs, write four good questions to ask when you meet someone new in the following situations:

D GOAL Discuss Endangered Languages

Reading 10 (Optional)

A In pairs, discuss the questions.

1. How many languages are spoken in your country?
2. How many languages do you speak?
3. Do you think language and culture are related?

B Are these statements true or false? Answer before you read the article. Then read and check.

1. Most people in the world speak a “large” language with many speakers.
2. We will not lose any more languages in the future.
3. Few people are learning the Maori language.
4. Technology is a danger to languages.

C For each idea, circle the TWO correct examples from the article.

1. world languages with the largest number of speakers
 - a. Hindi
 - b. Maori
 - c. Spanish
2. Tuvan words that show a connection with animals
 - a. *ak byzaa*
 - b. *songgaar*
 - c. *ezenggileer*
3. technology that helps save endangered languages
 - a. telephones
 - b. the Internet
 - c. talking dictionaries

D What do the following numbers refer to in the article?

7,000 230 500,000

✓ GOAL CHECK

Discuss the questions in a small group. Then share your ideas with another group or with the class.

1. Why might it be important to speak one of the world’s “large” languages? Make a list of 3–4 reasons.
2. Why are organizations trying to save endangered languages? Why are those languages important?

Endangered Languages

There are around 7,000 languages in the world today. However, most people speak the largest languages: Chinese, Spanish, English, Hindi, Russian, Arabic, and others. So what about the smaller languages? According to the UNESCO Atlas of the World’s Languages in Danger, around one-third of the world’s languages now have fewer than 1,000 speakers. We may soon lose those languages completely. In fact, 230 languages became “**extinct**” between 1950 and 2010.

Unfortunately, when we lose a language, we also lose its culture and knowledge. That’s because people in different places have different ways of living and thinking. One example of this is the Tuvan language of southern Siberia. Tuvan people depend on animals for food and other basic needs. Their language shows this close connection between people and animals. The Tuvan word *ezenggileer*, for example, means “to sing with the **rhythms** of riding a horse.” And the word *ak byzaa* is “a white **calf** less than one year old.”

In some places, people are working to save traditional languages. Many schools in New Zealand now teach the Maori language. This helps connect native New Zealanders to their Maori culture. And Welsh is spoken by around 500,000 people in Wales. The Welsh government is working to increase that number to one million by 2050.

Technology could be another way to save endangered languages. National Geographic’s Enduring Voices project has created “Talking Dictionaries” - the recorded voices of people communicating with each other. All of them are fluent speakers of **endangered** languages. And because these dictionaries are available to anyone on the Internet, people now and in the future can learn some of the vocabulary, greetings, and grammar rules of past languages.

extinct (adj) a language is extinct when it has no living speakers

rhythm (n) a regular series of sounds or movements

calf (n) a young cow

endangered (adj) in danger of soon becoming extinct

K. David Harrison, co-director of the Enduring Voices project, works with Abamu Degio and Anthony Degio to record songs in Koro Aka, an endangered language from northern India.

WRITING SKILLS: Giving Examples

Giving examples is a good way to help your reader understand your ideas. Two common ways to introduce examples are *such as* and *for example*.

*Study tools, **such as** flash cards, can be helpful for learning new vocabulary.*

*It's also important to find ways to hear a new language. **For example**, online videos and music are good for listening practice.*

D Complete the paragraph.

There are several things one can do to learn a new language. First, an app for video chats, such as _____, can be helpful as it allows you to practice speaking with others in a real-life setting. Second, you can work on improving your vocabulary. For example, I like to use _____ to learn new English words about different topics. It's also a good idea to use the new words in speaking and writing as much as possible. Moreover, it's important to read something every day in the language you are learning. For instance, _____ are all good sources of information for language learners. In addition, don't forget to talk with people who can help you, such as _____. They can give you valuable advice on language learning. Finally, remember that practice makes perfect. Don't worry about making mistakes and just keep practicing the language until you feel comfortable using it to communicate.

E In your notebook, make a list of 3–4 things you do and don't recommend for language learning. Use your own ideas and examples. Share your list with a partner.

Do	Don't

F In small groups, look at the box. Talk about good ways for these different kinds of people to learn a language. Use examples.

high school students young children older people with free time	tourists planning to visit another country people planning to study abroad ...
---	--

I think children learn a lot from language teachers. For example, they might sing songs or practice saying new words in class.

That's true, and older students like to use social media websites, such as Facebook and Twitter.

Good point! High school students can also learn a language by taking part in exchange programs.

GOAL CHECK Give Examples

Write a paragraph (150–180 words) in your notebook to discuss things you do and don't recommend for language learning. Use your notes in **E**.

WORD FOCUS

Compound nouns

A compound noun is a noun that is made up of two or more different words. The first part typically states the type or purpose, and the second part states who or what is being named. We can use any part of speech to create a compound noun, not just nouns, as long as it functions as a noun in the sentence. The other parts of speech used to create compound nouns may be adjectives, prepositions, or verbs. Examples of compound nouns: *sidewalk, city center, greenhouse...*

A Read the article.

Changing Cities

- By the year 2050, 66% of the people on Earth will live in large cities. Most of them will live in tall **apartment buildings**, so it makes sense to design those buildings in ways that are good for the environment. **Rooftop gardens**, for example, save energy for heating and cooling and are a comfortable place for people to spend time.
- Crossing the street in a big city can create problems. One solution is the “X-crossings” found in Tokyo, Japan, and other cities. There, when the **traffic light** turns red, all of the vehicles must stop. Then, the pedestrians can cross in any direction. Another solution could be **neighborhoods** with more stores and restaurants on every block. This makes it easier for people to walk to the places they need to go.
- In the future, many cities will have many kinds of **public transportation**, like Hong Kong. In addition to cars and taxis, people in Hong Kong use buses, trains, boats, and **streetcars**—all convenient ways to get around the city.

B Write each word in blue next to the correct meaning.

Sarah: It doesn't have many different stores. There's only one supermarket, so the food is very expensive.

Ben: That sounds like a pretty big problem.

Sarah: It is, but the city is building a new shopping center now. Next year, we'll have more stores.

Present Participles	
The present participle is the <i>-ing</i> form of a verb. It has an active meaning and can be used in a present participle clause as a subordinate clause in a sentence. The present participle and the verb in the main clause must have the same subject.	After moving into my new apartment , I'll meet my neighbors. (= After I move into my new apartment , I'll meet my neighbors.)
Use the present participles to describe actions that happen at around the same time.	Turning the corner , she saw a crowded shopping center in front of her.
Use the present participles to explain an action or event.	Being a new resident in the area , John doesn't know the way to the city center.
Present Perfect Participles	
The present perfect participle consists of the auxiliary <i>having</i> and the past participle of a verb.	Having found a new job , I decided to move to the city. (= After I had found a new job , I decided to move to the city.)
Use the present perfect participles to emphasize an action that is completed before the action in the main clause.	Having talked to all the neighbors , they started designing the garden.
Use the present perfect participles to describe a reason or a cause. (This is because the reason or cause happens before the action in the main clause.)	Having developed an interest in acting , she moved to Los Angeles.

Streets for People

Walking is a great way to get around. For short trips, for exercise, or just for fun, walking can be better than driving or riding. But in many cities, walking can also be dangerous. Cars, trucks, and motorcycles are a danger to pedestrians, and sometimes there are **accidents**.

David Engwicht, from Brisbane, Australia, wants to do something about this. His book, *Reclaiming Our Cities and Towns*, has a simple message: We need to take back our streets and make **them** better places for walking.

People walking down the Shibuya Crossing, one of the world's busiest crosswalks, in Tokyo, Japan

In the past, Engwicht says, streets belonged to everybody. Children played there, and people walked to work or to stores. Now, however, most city engineers design streets for vehicles. People stay inside buildings to get away from the crowded **sidewalks**, the noisy streets, and the dangerous traffic. Unfortunately, **this** gives them less contact with their neighbors.

Many cities are working to make their streets safer for pedestrians. There are new **crosswalks** on the streets and more traffic lights and bicycle **lanes**. The city of Florence, Italy, only allows cars and buses with special **permits** to drive on its historic city streets. In Boston, US, the Slow Streets Program gives some neighborhoods more stop signs and a 20 mph (32 kph) speed limit.

Engwicht travels around the world, helping people think differently about pedestrians, streets, and neighborhoods. Whether we live in a small town or a city with a population in the millions, Engwicht says we should think of streets as our "outdoor living room." Changing the traffic is just the beginning. In the future, streets may again be safe places for people, and walking will be an even better form of transportation than **it** is now.

accident (n) something harmful or unpleasant that happens by surprise

sidewalk (n) a path with a hard surface along the side of a street

crosswalk (n) a place where drivers must stop to let pedestrians cross a street

lane (n) a part of a street that is marked with painted lines

Writing

WRITING SKILLS: Topic Sentences

Most paragraphs in English begin with a topic sentence. The topic sentence tells us:

1. the main idea (What is the topic of the paragraph?)
2. the controlling idea (What does the paragraph say about the topic?)

A good topic sentence helps the reader understand your ideas.

People rowing boats and cycling in Central Park, New York

C Read the paragraph.

^{main idea} Green spaces ^{controlling idea} increase the quality of life in cities. Parks, beaches, and other green spaces are good places to be active. Every morning, a lot of people go jogging, do yoga, play badminton, or walk in the park. In the afternoon, beaches are the favorite places to watch sunset for others. Playing sports and doing other kinds of recreation help people in cities stay healthy. **Furthermore**, these spaces give people contact with nature. Seeing green plants and hearing birds in the trees are pleasant breaks from a noisy city. Therefore, green spaces are good not only for people's physical health but also for their mental health. **Moreover**, because they are good places for special events, green spaces can make communities stronger. Hearing a concert in the park with friends and neighbors, for example, is a great way to enjoy city life. Though the busy life in cities may make it hard for people to know even their next-door neighbors, green spaces provide great opportunities to meet other people, while at the same time enjoying a positive atmosphere.

WRITING NOTE

The words **furthermore** and **moreover** can show that you are moving on to the next idea.

D Discuss the questions in pairs.

1. Where is the topic sentence located?

For older students, the national university is located in my city. It is quite large, and it attracts top professors from here and around the world. And for people who want job training, my city has several technical schools. They offer programs in everything from nursing to solar-energy technology. All of these education options help to make my city a good place to live.

1. What do you remember about the three research studies?
2. In each study, why were the participants' attitudes important?
3. Talk about a time when a positive attitude helped you in some way.

Attitude Is **Everything**

Kelly McGonigal is a health psychologist with some good news: Stress may not be the **enemy** of good health. McGonigal came to this conclusion after looking at three important health studies. In the first study, researchers at the University of Wisconsin asked 30,000 adults how much stress they had experienced. They also asked whether the **participants** thought this stress was harmful to their health. Eight years later, one group of participants was 43% more likely to have died—the people who had a lot of stress and believed that stress was bad for them. Those who had a lot of stress but did not believe it was harmful actually had the lowest risk of dying!

According to McGonigal, the way we think about stress is important. In fact, our mind and attitude can have beneficial effects on our health. In a study at Harvard, researchers taught participants to believe that signs of stress—a faster heartbeat, for example—were the body's

way of preparing them to meet a challenge. Under stress, most people's blood vessels become narrower. That makes it harder for blood to flow, but the blood vessels of the study participants stayed open and relaxed, simply because they thought about stress in a different way.

McGonigal also points to a study of the connection between stress and human contact. Researchers from the University at Buffalo studied people who had experienced very stressful events. Surprisingly, if they had spent a lot of time helping others, they had no increased risk of dying. It seems that enjoyable activities such as giving a friend a ride or babysitting a neighbor's child can help us stay healthy even under stress.

WRITING SKILLS: Using Supporting Details

A good topic sentence gives the main idea of a paragraph. In addition, a good paragraph includes details to support, or give more information about the main idea.

Some types of supporting details:

descriptions

examples

explanations

facts

reasons

D Underline the topic sentence in the following paragraph. Then answer the questions below.

Although there are several ways to prevent the spread of disease, staying home when you are sick may be the best way. First, when you stay home, the germs in your body are kept in your own room or home only. Therefore, no one at school or at work has contact with your germs. It is also easier to clean your home of the germs than a public place. Moreover, when you are sick, covering your mouth when you cough at the school or workplace may be less effective than staying at home. Some of your germs are still sent into the air when you talk and breathe. Finally, washing your hands after every cough or sneeze may be the least effective way to keep other people healthy. Even with a portable hand sanitizer, it may not be possible to clean your hands that many times in a day and you may also be distracted a lot in doing so.

1. What is the topic of the paragraph? (i.e., What is the paragraph about?)

2. What is the controlling idea? (i.e., What does the paragraph say about the topic?)

E Complete the chart with supporting details from the paragraph in **D**.

Reason to stay at home when sick	Reason why covering one's mouth is less effective	Reason why washing one's hands often may be the least effective

Grammar (See Grammar Reference pp. 150–151)

The Past Continuous vs. The Simple Past; Subordinating Conjunctions: <i>When</i> and <i>While</i>	
Use the past continuous to talk about something that was in progress at a specific time in the past. Form the past continuous with <i>was / were</i> + the <i>-ing</i> form of a verb.	I saw Sasha at the library yesterday. He was working on his assignment. We weren't watching a movie at 8:00 last night. We were studying for a test.
Use the simple past to talk about completed actions or situations.	Edmund Hillary and Tenzing Norgay climbed Mount Everest.
Use subordinating conjunctions to join two clauses together. They make one clause dependent upon the other. Living Happily Together: Tràm Chim

Tràm Chim—a national park in Đồng Tháp Province, Việt Nam—was established in 1999 to preserve the valuable **submerged inland ecosystem**. It is home to many fish and plant species, and a frequent destination for birds such as red-crowned cranes and herons.

Bản sách mẫu

Unfortunately, human activities around the park are threatening it. More and more shrimp ponds are being constructed. While bringing money to farmers, they prevent fertile floodwater of the Mekong River from entering the park. The lack of nutrients in the water, together with the common practice of overfishing and cutting down trees in the park, has put a large number of species in danger.

The local government has found a solution to this problem in ecotourism. Together with a number of national and international organizations, they are persuading local residents to make a living from the park in a more sustainable way. Families receive training and equipment to provide tourists with

homestay services and local specialties. They also row wooden dinghies to bring tourists into the park for birdwatching during the day or to enjoy a rare experience of nocturnal sounds after sunset.

It is not easy for these farmers to turn into hosts and guides, though. To talk to foreign tourists, for example, they have to use body language frequently due to the language barrier. Luckily, those conversations end with hearty laughter most of the time. It may be hard for the farmers, but they are willing to learn how to make themselves, the tourists, and the park happy altogether.

Besides subordinating conjunctions like *when* and *while*, you could also use many other conjunctions to join words, phrases, or clauses in a sentence. GOAL CHECK

Join another pair and discuss the questions.

1. Do you think the benefits of distance learning are greater than the benefits of face-to-face learning?
2. What are some drawbacks of distance learning?
3. Is distance learning suitable for you?

The Evolution of Distance Learning

Distance learning is not a new approach to instruction and learning. In fact, **correspondence courses**, which are the oldest form of distance learning, have been used for over 150 years. Thanks to the development of technology, distance no longer poses a problem to learning. Students can study anywhere they want without having to be present in the class at all times, which allows them to combine their studies with work or family life.

Advances in digital technologies have provided innovative strategies for teaching from a distance. This has made distance learning more interactive. In the past, distance learning usually included no in-person interaction between teachers and students. However, digital forms of communication have changed the distance-learning environment.

Communication technologies such as messaging applications, video conferencing tools, discussion boards, and learning management systems (LMS) can increase learner engagement. Students can use break-out rooms on the Zoom platform, for example, to work in groups. They can also join interactive games on Kahoot!. Students can also get materials and projects from their school's LMS.

A key benefit of distance learning is **flexibility**. This helps students adapt learning to their personal schedules as well as location. When COVID-19 was declared a global **pandemic** in March 2020, a shift to distance learning became necessary due to school closures. Students did not need to commute from home to school. They could continue participating in class without being tied to a specific location. The availability of distance learning has added to its increasing popularity in education.

correspondence course (noun phrase) a course of study in which students study at home and receive and send off work by mail or email

flexibility (n) the ability to change or be changed easily

pandemic (n) a disease that affects many people across a whole country or the whole world

E

GOAL Describe an Important Transition in Your Life

from child to teenager
 from teenager to adult
 from single to married
 from studying to working
 from non-parent to parent
 from middle age to old age

Communication

A What do you know about each life transition in the box? Tell a partner what you think happens or what you have experienced. Listen carefully while your partner speaks. Ask questions to get more information.

As a teenager, I had different friends.

B Discuss the questions in pairs.

1. Who does the cleaning and other chores at your house?
2. How often do you do your own laundry?
3. When was the last time you bought groceries?
4. Are you old enough to vote?

Me, too. I spent more time with the friends I had made in high school.

How much do you remember about that time?

It's difficult to remember. It was a long time ago.

Writing

WRITING SKILLS: Using Time Expressions

Time expressions help your reader understand when different events happened.

As soon as he realized his mistake, he apologized for it.

This means there was no delay. He didn't wait until later to apologize.

We had **already** read about Einstein's early life, so we didn't need to hear a lecture about it. The word *already* emphasizes that the reading happened before the lecture.

Example time expressions: *until / by + date or time never last week / month / year after that eventually a week / month / year ago*

C Read the sample paragraph and discuss the questions below with a partner.

1. What is the topic sentence in this paragraph?
2. What two examples support the topic sentence?
3. How did the writer feel about this transition in his or her life?
4. How do the bolded expressions help you understand the writer's meaning?

When I finished middle school and started high school, my parents began to give me more responsibilities. I had **already** started to wash some of my own clothes when I had no homework to do, but **that summer** it became my responsibility to do laundry for the whole family. My other chore was buying groceries for my elderly grandmother, who lived a few blocks away from my neighborhood. I went to visit her **twice a week**, and I asked her what she needed from the grocery store. She gave me the shopping list and some money, and I returned with her food, soap, and other necessities. It wasn't hard to do at all. In fact, it was fun and I really enjoyed spending time with her that way. I also began to feel good about doing my family's laundry each week. It felt like I was learning to take responsibility and moving from childhood toward adulthood.

D Complete the questionnaire. Write answers in your notebook.

QUESTIONNAIRE

1. Where do you live now?
2. How many times have you moved in your life?
3. As a child, what did you dream of being or doing when you got older?
4. What do you dream of being or doing now?
5. When did you meet your best friend or friends?
6. What are some of the most important personal relationships in your life?
7. What event in your life do you think changed you the most?

A child looks out as his mother votes in an election. The ability to vote is often one milestone that marks the transition into adulthood.

GOAL CHECK

Describe an Important Transition in Your Life

1. Read your answers to the questionnaire—especially to question 7. Write a well-organized paragraph (150–180 words) about a life transition and make sure it includes the following:
 - a good topic sentence
 - plenty of interesting details
 - time expressions to show when things happened
2. Take turns. Tell your partner about the life transition you described in your paragraph. Was it easy or difficult for you to write about?

Look at the photo and answer the questions:

- 1** What do you see in the photo?
- 2** Why is doing something that matters important?

A group of young orangutans with reddish-brown fur are gathered together, looking towards the camera. They are in a lush green forest setting. A person's hand wearing a white glove is visible at the top, holding a yellow object. The background is filled with tall green grass and other vegetation.

A keeper at the International Animal Rescue center takes a group of young orangutans to the forest to learn skills to live in the wild in West Kalimantan Province, Borneo, Indonesia.

Murano contemporary art, made from glass, is considered a luxury.

Life is full of **choices**. Should you buy the latest smartphone, or put your money in a savings account **instead**? Do you really need that phone, or is it a **luxury** you can live without? These are questions that are asked every day, and for many people, the answer is to **reduce** the **amount** of money they spend in order to increase their happiness.

If you believe the TV commercials, the journey to a **satisfying** life is made in a beautiful new car. Owning nice things is supposed to **produce** good feelings in people. Now, though, more people are deciding not to **waste** their money on a new car when they can easily take the bus or drive an older car. Instead of doing things the **usual** way—working too much and enjoying life too little—they are choosing to focus on the **quality** of their lives. They're spending more time doing the things they love and less money buying things they don't need.

1. What might you like and dislike about a person's lifestyle?
2. What might make a lifestyle satisfying for the person?

I might like having an important job at a bank.

I think it might be more satisfying to work outdoors.

A Zero-Waste Lifestyle

In the United States, throwing away a lot of trash is not unusual. The average American produces around 680 kilos of trash each year. On the other hand, everyone has choices when it comes to their lifestyle, and the US is also home to people like Kathryn Kellogg. She and her husband live in California, and they throw away very little. In fact, the amount of trash they produced in two years—every bit of waste that they could not recycle, reuse, or turn into **compost**—fit into a small glass jar.

Kellogg writes a popular **blog** called Going Zero Waste. Her blog posts encourage others to make better choices and live better lives. She reports that she and her husband are saving around \$5,000 a year at the grocery store. Instead of buying prepared foods and commercial cleaning products, they buy fresh foods that they cook themselves and make their own cleaning products. They even make their own deodorant and skincare products.

The real goal of going zero waste, however, is not just to save money. For another couple, Mr. and Mrs. Frugalwoods, the goal is to enjoy life more and spend more quality time together as a family. Their blog, Frugalwoods, includes articles about buying less and saving money, growing food at their home in Vermont, and raising their baby girl. Mrs. Frugalwoods says that their daughter, "...is our mini gardener/hiker who adores being outside in nature with her parents..."

Many people would like to waste less, and the Internet is full of ideas to help them. There are people living zero-waste lifestyles and blogging about it not only in the US, but in many other countries as well.

compost (n) a mixture of decayed plants used to enrich garden soil

blog (n) a website with a diary or journal about a certain subject

Growing one's own vegetables is part of a lifestyle choice.

Writing

- E** What are some of the things you want to have in your future life? They could be material or non-material things.

Things I want
<ul style="list-style-type: none">•••••

WRITING SKILLS: Using Sequence Words

When you describe the order of things or the steps in a process, sequence words help the reader understand your ideas.

Sequence words: *first, second, finally, before / after* ____, *next, last, once* ____, *then, eventually*

Example: When I think about my future, I have some priorities. **First**, I want to get a good education and focus on improving my English skills. With good English, I will be able to further my study abroad, perhaps in an English-speaking country. A good command of English can also help me adapt to the new culture quickly. That will open a lot of doors for me. **Then**, I will apply for a part-time job to support my study and learn some new skills. When I graduate from college, I want to come back to Việt Nam to find a job. I plan to work for someone else for a few years to get some work experience and then start my own business. **Next**, I need to buy a house so that I can settle down. **After that**, I might get married and start a family. **Eventually**, I'll retire and let my children run the business.

- F** Tell a partner what you decided to include in your paragraph. Explain why each idea is important to you.

I decided that saving money for the future is important to me.

What will the money eventually be used for?

GOAL CHECK Set Priorities

H Read the information. What does *sustainable* mean?

Fish is one of the world's favorite foods. Around the world, the average person eats 36 pounds (16 kg) of fish every year. But many kinds of fish around the world are disappearing because people catch too many of them. Scientists say that 90 percent of the biggest fish are gone now. If we catch too many big fish now, there won't be any baby fish in the future. Some species of fish will become extinct. Our way of fishing now is not **sustainable**—if it continues, it will hurt the environment.

WORD FOCUS

The word **environment** can refer to nature in general or to everything that's around us in a particular place. *Recycling paper is good for the environment.* *This classroom is a good environment for learning.*

GOAL CHECK Discuss Ways to Solve Future Problems

The Moholoholo Wildlife Rehabilitation Centre in South Africa works **hard** to protect local wild animals. This rescue center saves many species from dangerous situations. Sometimes the animals seem **badly** injured or poisoned, and often they have been orphaned because of poaching. The center looks after the animals **carefully**. Some recover **quickly** and can be released into the wild again **rapidly**. However, others seem more vulnerable and have to stay **permanently**. The center also offers an education program. People who feel interested in conservation can visit the center to learn about wildlife and environmental protection.

Conversation (Optional)

G  42 Listen to the conversation with your book closed. Why was the deer at the rescue center?

Dan: I didn't know you worked at the wildlife rescue center.

Carmen: I become really interested in conservation, so I started helping there last year. It seems a lot of work, but I see some amazing animals. The vet brought in a beautiful deer this morning. It looked badly injured.

Dan: Oh no, what happened to it?

Carmen: A car hit it on the highway last night.

Dan: So, what did you do?

Carmen: Well, the vet checked the deer carefully, and she found it has a broken leg.

Dan: If she recovers quickly, will she go back to the wild?

Carmen: We hope so.

2. How have they solved the problem?
3. What do you think Samson means when he says, "We are all in this together"?
4. What has happened as a result of the Sea Turtle Conservancy's project in Florida?

GOAL CHECK

1. What can you do to make a difference for the environment? Write a list of specific actions and habits you could change.
2. Share your list in pairs. Do you have any ideas that are the same? What different ideas do you have?
3. Discuss a conservation project.

 - d. With your group, present the project you researched to the class.

Making a Difference

Human actions are affecting the environment, and if we don't try to change things, we will lose more of the natural world. Even though it is hard, we can make a difference.

In Madagascar, a fisherman named Samson is helping his **community** take better care of its local waters. He and the other fishermen realized that they were overfishing. Working with the World Wide Fund for Nature (WWF), Samson learned that they shouldn't catch so many young fish because if there are too few of them in the ocean, there won't be enough adult fish to reproduce. Samson now works to help fishermen change their techniques

Bản sách mẫu

so that fishing can be sustainable. He believes that protecting the ocean is everybody's job. "Take your responsibilities with courage and never think that you are alone. We are all in this together."

In Florida, in the US, the Sea Turtle Conservancy (STC) **organization** noticed that there were always a lot of single-use plastic items, like coffee stirrers, bottles, and drinking straws, on the beaches. All of these items can hurt the ocean wildlife terribly. Straws are especially dangerous for turtles: they can get **stuck** in turtles' noses and hurt them very badly. So, the STC started the project "Where are the straws?" asking local restaurants to stop giving customers

straws with their drinks. Now, many restaurants will only give straws if customers ask for them, and the straws they do give out are paper, not plastic.

Those are just two of the many conservation efforts found all over the world today. These projects all show us that change is possible and that it can start with small actions in our own community. We are part of the problem. It's time to be part of the solution.

community (n) a group of people who live in the same area
organization (n) a group of people who work together
stuck (past participle) if something is stuck, it can't move

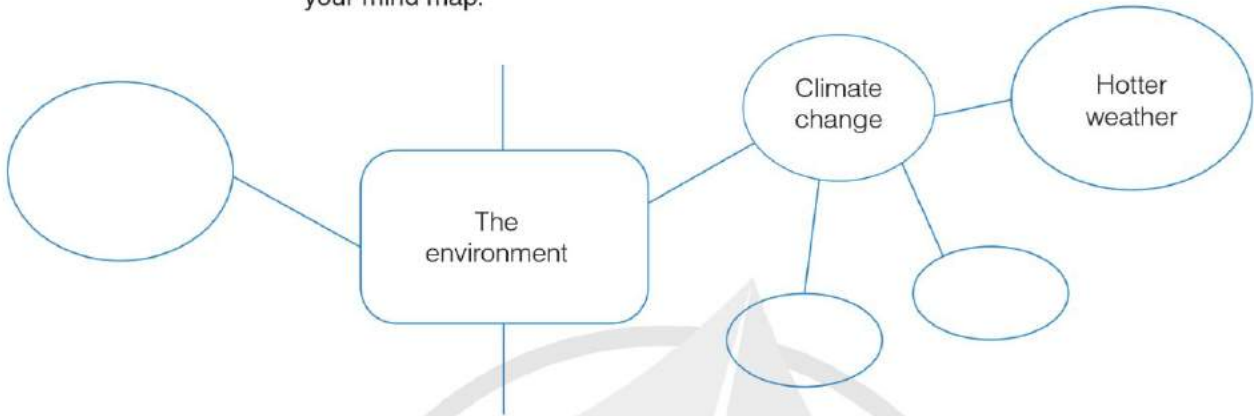

An endangered green sea turtle entangled in a fishing net swimming underwater

GOAL Explain a Conservation Issue

Communication

- A** Draw a mind map in your notebook. In the center, write *the environment*. Brainstorm problems related to the environment in your country. Write them in your mind map.

- B** Share your mind map in pairs. Explain the problems you wrote.
- C** In pairs, identify the causes and consequences of each problem and add them to your mind map. Then, join another pair and discuss possible solutions for the problems. What can local people do? What actions will help solve the problem or improve the situation?

If people use their cars less, climate change will be slower.

Yes, that's true. We can make a carpool plan at work so fewer people drive to work every day.

Writing

- D** Complete the sentences about a problem in nature in your country.
1. If we believe in conservation, we will _____.
 2. If _____, many animals will be saved.
 3. If people want to make positive changes, they will _____.
- E** Write *but*, *so*, and *even though* in the correct places in the paragraph.

WRITING STRATEGY

Conjunctions are used to connect ideas within sentences.

By the 1990s, many species of animals were endangered in Namibia because of poaching. The situation was serious, (1) _____ conservationists needed to find a way to protect the animals. They found one, (2) _____ it wasn't what you would expect: they asked poachers for help. (3) _____ this seemed crazy, I think it was a great idea. If we want to protect endangered species, we need to consider every solution.

F Complete the text with the word and phrases in the box.

One effective solution	For example	To do this
Besides	Another solution	One reason

Many developing countries in South East Asia are witnessing an alarming increase in poaching. This causes great concern in those countries. There are several reasons why many people continue their illegal act of hunting wild animals. (1) _____ is that people hunt for some parts of rare animals' body. (2) _____, they kill elephants for ivory or rhinos for horns. (3) _____, some local people hunt wild animals for food. If poaching continues, it will threaten the survival of many species. Poaching also affects the natural ecosystem. In particular, the ecosystem will be unbalanced if one species becomes extinct. To prevent these possible consequences, both governments and people should take action. (4) _____ is raising public awareness of poaching problems. (5) _____, schools can educate students about the importance of wild animals and the dangers of poaching. (6) _____ could be making the laws against poaching stricter. Building more wildlife rescue centers like the Moholoholo Wildlife Rehabilitation Centre in South Africa is also a good suggestion to solve the issue of poaching.

G Choose the possible causes and effects of climate change. Then work in pairs and discuss some solutions to this environmental issue.

Environmental issue	Causes	Effects
Climate change	1. burning fossil fuels	a. hotter temperatures
	2. forcing circus animals to perform	b. loss of species
	3. using recycled products	c. more natural disasters
	4. cutting down forests	d. more jobs for human
	5. hunting wild animals	e. risks of animal abuse

✓ GOAL CHECK Explain a Conservation Issue

1. In your notebook, write a passage (150–180 words) with introduction, development, and conclusion, explaining an environmental issue in your country. Explain the causes and consequences of the problem and give some possible solutions.

Today, many people travel from one country to another easily, but long-distance travel used to be very **challenging** hundreds of years ago. Still, there were always people who wanted to discover new places. Explorers used to travel on trips that often took many years, and the result was an **exchange** of knowledge and culture that changed the world.

Marco Polo (1254–1324) was one of these great explorers. He lived in Venice and Genoa, in what is now Italy. In 1271, at about 17, he **set off** on a trip with his father and uncle and traveled east—far beyond the borders of Europe, into Asia.

Marco's father was a merchant searching for **opportunities** for **trade** with China. They traveled first by ship, then by horse and camel, through many countries. Everything was very different: they saw amazing places and learned new things. In China, for example, they were surprised to see paper money, eyeglasses, the compass, and **silk** making.

Marco Polo returned to Italy 24 years later with lots of experiences to share. But he only became famous after his book, *The Description of the World*, was **published**. The book inspired other world travelers centuries later.

E Read the information about the New Seven Wonders of the World.

What does it mean to be a “wonder of the world”? Both the Seven Wonders of the Ancient World and the New Seven Wonders are examples of humankind’s greatest achievements. They include historical sites that show the incredible things we are capable of creating. Of the original Seven Wonders, only the Great Pyramid in Giza, Egypt, still exists, so Swiss-Canadian filmmaker and adventurer Bernard Weber started the New Seven Wonders of the World project. He wanted the greatest achievements of the last 2,000 years to be recognized now and remembered in the future. He also wanted regular people to decide on these new wonders by voting over the phone and internet. The project began in the year 2000, and the results were announced in 2007 with nearly 100 million votes. The new wonders include the Great Wall of China, the Colosseum in Rome, and the Taj Mahal in India.

Reading 53 (Optional)

A MY WORLD What do you like about traveling? Is there anything you don't like about going somewhere you've never been before? Tell your partner.

B Scan the article, and add the phrases (a–d) to the paragraphs (1–4) to create subheadings.

- Travel is good for your health.
- Travel promotes cultural understanding.
- Travel takes you out of your comfort zone.
- Travel helps you become a global citizen.

C Read the article again. Circle **T** for *true* and **F** for *false*.

- Sightseeing can involve exercise. **T** **F**
- Global citizens want to work together to solve the world's problems. **T** **F**
- We can't learn about culture in restaurants, cafes, or markets. **T** **F**
- We learn about ourselves when we travel. **T** **F**

D Answer the questions.

- Why are challenging situations sometimes good for us?

- Why is travel good for your mind and body?

- What does the term *global citizen* refer to?

- How do we learn about our own culture when we travel?

- Why is cultural understanding important?

✓ GOAL CHECK

1. Remember a trip you have taken. Write notes to answer the questions.

Where did you go, and how long did you stay?

What was the most challenging / interesting / frightening / unusual moment of that trip?

What did you learn during the trip?

2. Tell a partner about your trip.

Four Reasons Why Traveling is Good for You

Bản sách mẫu

1. _____

In our daily lives, we generally know what we're going to do, where to go, and who to ask if we need something. We're in our comfort zone; we're comfortable. When we travel to a different country, where people might speak a different language, we leave our comfort zone, and sometimes that can be frightening. But it's worth it! Challenges help us grow and become more confident.

2. _____

Changes in location and breaks from our routine make us feel better. We are **stimulated** by seeing new places and experiencing new cultures. Also, when we travel, we are often more active, so we do more exercise, even if it is only walking around a new city sightseeing. Traveling can be very **motivating**, so it is good for your mind and your body.

3. _____

There are a lot of problems in our world that will cause bigger problems in the future if we don't find solutions. With climate change, pollution, and other environmental issues in front of us, we need to work together as **citizens of the world**. When you travel, you meet new people, make new connections, and understand the world better. This helps you become a global citizen.

4. _____

When we travel, we can visit museums, art galleries, and festivals, as well as restaurants, cafes, and markets. All these things help us learn about the history and culture of a country and help us understand that people around the world think differently and do things differently. When we travel, we learn about a country, its culture, and its people, and we come home with new understanding. This opens your mind and can help you respect others and see your own culture more clearly.

to stimulate (v) to make someone excited and interested about something

motivating (adj) making you want to do something

GOAL Describe a Cultural Event

Communication

A Read the text. What cultural festivals or events do you know about? Write a list.

Hawaii's Lantern Floating Festival

People travel from all over the world to participate in Hawaii's Lantern Floating Festival. Lantern Floating Festival is a ceremony to remember family and friends who have died. It takes place on Memorial Day, the last Monday in May. The festival begins with music and singing, and then, as the sun sets, everyone lights their lanterns. Each lantern has a message written on it, and sometimes people also attach photos of their loved ones to them. Once they are lit, the lanterns are released onto the water. It is a truly beautiful sight. Lantern Floating is a moment to remember and give thanks to the people who have left the world before us.

B Choose an event from your list, and write notes about it. Use the questions.

4. What do people do?
5. Do people come from far away to go to the event?

Writing

Lim Festival

Around mid-January of the lunar calendar every year, thousands of people from the north of Việt Nam travel to Bắc Ninh. They travel there to participate in the Lim Festival, a cultural event that dates back more than 300 years. The celebration usually starts with a parade where villagers are dressed in colorful traditional costumes. Then, many rituals take place to worship Gods and to honor the founders of the festival. In the main part of the festival, people hold many folk games such as wrestling, chess, weaving competitions, and rice cooking competitions. However, the most important activity is the art of “Quan Họ” singing, which was recognized as an Intangible Cultural Heritage by UNESCO in 2009. Male and female singers in traditional costumes challenge each other by singing a song, in which each partner must sing different lyrics to match their partner’s melody. So, if you like travel, art, and unusual experiences, you should visit Bắc Ninh next spring!

- E** Use your notes from **B** to write a paragraph (150–180 words) for a travel blog. In your blog, you want to encourage people to visit your country for a cultural event. Use the text in **D** to help you.
- F** Exchange paragraphs with a partner. How can your partner improve his or her paragraph? Write notes on the paragraph. Use your partner’s comments to make corrections and improvements.

A Read the article. What are the noun forms of the words in blue?

A. J. Coston isn't waiting to start his dream job. At age 18, he's a weekend volunteer firefighter in the United States. During the week, he lives at home with his mom, dad, and sister, and does his main job: going to high school. "I have always wanted to get into firefighting... since I was a little kid watching fire trucks go by," he says. "One day I was **bored** and on the Internet, and I found out that Loudoun County offered a junior firefighter program."

Some of A. J.'s friends are **surprised** by his decision to spend weekends at the firehouse, but to A. J., helping people is more **satisfying** than anything else. The job is never **boring**, either, since firefighters get called to all sorts of emergencies. One **terrifying** moment for A. J. was getting an emergency call after four children were struck by lightning. Luckily, all four survived.

A. J. will be off to college next fall and plans to study what he's most **interested** in: emergency medical care. "I want to be a flight medic on a helicopter eventually," he says.

Cleft sentences *It is / was... that...*

<p>Cleft sentences are used to emphasize a part of the sentence. In a cleft sentence, a message is divided across two clauses. The <i>It</i>-clause emphasizes the focused information while the <i>that</i>-clause contains the remaining information.</p>	<p>Did Jane organize the meeting? – No, it was Susan that organized the meeting. Did Susan meet the employees? – No, it was the candidates that Susan met. Did she meet them in the cafe? – No, it was in the office that she met them. Does she work at District 1? – No, it is District 2 that she works at.</p>

<p>We can leave <i>that</i> or <i>who</i> out if it is the object of the verb.</p>	<p>It was Mary (that / who) I called yesterday.</p>	<p>For our company, it is our experience (that) we value the most.</p>
<p>If the focus is a plural subject, the verb in the <i>It</i>-clause is still singular.</p>	<p>It is the managers that / who are interviewing John.</p>	<p>It was the application processes that made us tired, not the job.</p>

C Decide whether *who* can be used instead of *that* in the following sentences. Write **Y** for yes and **N** for no. Circle *that* if it is not needed.

1. ____ This job pays well, but it is its safety risks that we are worried about.
2. ____ Although the salary is high, it was the boss that made us want to leave the job.
3. ____ It wasn't the trainer that made us bored. The contents of the training did.
4. ____ We all like this job. However, it is the salary that we don't like.
5. ____ The employees suggested many ideas, but it was the owner that decided on the final one.

2. Although you may have high qualifications, _____.

D **GOAL** Discuss Gender Equality in Careers

Reading 58 (Optional)

- A** Read the definition of *stereotype* in paragraph 1. In groups, give some examples of stereotypes that you know.
- B** Skim the article and choose the best option for the main idea.
- Job duties are changing the world's values.
 - The decrease in gender stereotypes gives people more job opportunities.
 - New gender stereotypes should be developed to suit new careers.
 - Independence and confidence are important in a career choice.
- C** Read the article. Complete the ideas.
- Gender stereotypes may negatively affect _____.
 - Gender stereotypes are becoming less _____.
 - As old limitations and stereotypes in many careers no longer exist, people are free to _____.
 - More and more _____ are joining the healthcare industry as nurses.
- D** Read the article. What do these words refer to?
- they (paragraph 1)
 - those (paragraph 3)
 - where (paragraph 3)

GOAL CHECK

1. Choose a career from the box and answer the questions. Write notes.

data scientist engineer web developer
receptionist clerk flight attendant

- What do you think this career involves?
 - What specific skills would you need?
 - What are the common gender stereotypes in these careers?
2. Share your ideas in groups.

A stereotype is a **fixed** belief about a group or individual. These stereotypes are not based on facts but on opinions, and **they** still exist in our society in different ways.

Among these are gender stereotypes—overly simple beliefs about the characteristics and abilities of men and women. Gender stereotypes may have negative effects on both genders. This includes having inaccurate ideas, making wrong judgments about people, or limiting people's potential and opportunities.

However, as technology grows and people have greater access to education and knowledge, gender stereotypes are not quite as common as in the past. In the workplace, people are getting more freedom to follow their dream jobs, especially **those** that were once reserved for the opposite gender. One example is in the field of aviation, **where** the job of a pilot used to be just for men. While some people still believe

that men are better at navigation and thus better fit for flying a plane, the number of female pilots has increased steadily over years. On the other hand, the healthcare industry is witnessing more and more men working as nurses—a role that used to be dominated by women.

While these two examples show that gender stereotypes are decreasing in the modern world, some people still have these old-fashioned beliefs without being aware. Then, how can this be solved? Raising people's awareness of the existence of stereotypes will be the first step. Be kind to everyone, and learn to accept each other's differences. And if you're planning your career or thinking about changing careers, remember the importance of independence, self-confidence, and the passion to follow your dreams.

The Rituals of an Important Life Event

Weddings have always been important moments for families and societies. Not surprisingly, they involve celebrations and rituals. Apart from the religious celebrations, there are many interesting elements in Southeast Asian countries' wedding rituals.

1. **Dowry** is usually held the night before the wedding ceremony. In this event, gifts are presented after older women in the family give the bride some tips on how to behave well toward her husband's family. The most common gifts are gold pieces and gold jewelry. These are considered the bride's **dowry** and also a way to help the couple to partly cover the expenses of starting their own family.

2. **Mong Kol**, it is not gold but water that plays a central role in Thai wedding rituals. While the bride and the groom sit next to each other and are joined by a headdress made from a single white thread (the Mong Kol), their most honored guests will use a blessed conch shell to pour water on their hands. The water is also blessed from a ceremony that was held earlier. This ritual is believed to bring good luck to the couple.

3. **Henna**, however, good luck is brought about by henna. A natural dye made from the henna plant, henna has been used for centuries as a form of body art. Before the wedding ceremony, the bride has henna patterns applied to her palms, her hands, and her feet. People believe that the deeper the color of henna is, the happier the couple's marriage will be.

dowry (n) an amount of money that a woman's parents give to the man she marries

Writing

E Read about how to write an opinion paragraph.

WRITING SKILLS: An Effective Opinion Paragraph

1. Begin with a strong topic sentence that clearly states your point of view.
2. Support your opinion by giving good, logical reasons for it.
3. End with a brief conclusion related to the opinion and reasons you gave.

F Read the passage about holiday customs. What is the author's opinion?

Old holiday customs are an important connection to our present and past culture, so we should not forget them. A culture is built upon a lot of values, beliefs, and practices. The customs, especially those shown in holidays and celebrations, are often the easiest parts to see in a culture. They form parts of our identities and help to distinguish one community from another. Therefore, practicing these customs is an easy way to let others know who we are. Moreover, the old customs also provide a connection between different generations. In today's busy world, members of a family may only gather during a holiday or a celebration. Then, during the preparation and practice of the old customs, we may see the older members explaining to the younger ones the meaning of the customs and the steps involved. In so doing, they not only pass on the traditional knowledge and beliefs within the customs but also strengthen the connections between the old and the young. That is why it is important to remember and practice old customs.

G Look at the Writing Skills box again. Identify the parts of the opinion passage in **F**.

1. Circle the topic sentence.
2. Underline the supporting reasons. How many reasons does the author give to support her opinion?
3. Circle the conclusion.

Supporting reasons	
Conclusion	

GOAL CHECK Share Opinions about Holidays

2. In small groups, share your passages. Do you agree or disagree with each other's opinions? Tell the class.

Lesson C

Present Participles vs. Present Perfect Participles

The present participle is the *-ing* form of a verb. It has an active meaning.

The present perfect participle is formed as *having + past participle*.

The present participle can be used in a present participle clause, with the same subject of the verb in the main clause.

I'll move to the city **after graduating from university**.

Having found a job in the city, I started looking for an apartment.

When moving (= When you move) to the city, will **you** rent an apartment?

Walking (= When you walk) around the city center, **you** will see many shopping centers.

Use present participle to show an event order. We can introduce participle clauses with <i>before</i> , <i>while</i> , <i>after</i> , or <i>on</i> to mark the sequence of actions more clearly.	Before choosing (= Before / choose) a new apartment, I will look at the neighborhood carefully.
Use present perfect participle to describe an action before another action.	Having moved (= After / had moved) into the new apartment, I started meeting my neighbors.
Use present participle to explain an action or event.	Coming (= Because he comes) to the city for the first time, he doesn't know how to get to the city center.
Use present perfect participle to describe a reason or a cause. (This is because the reason or cause happens before the action in the main clause.)	Having found (= Because / had found) a good job, I decided to move to the city.

C Circle the correct answers.

- When they *improve / improving* public transportation, more people will use it.
- Having built / After built* more roads in the city, the government could reduce traffic congestion.
- There will be less traffic after they *open / opening* the new subway.
- Before *moving / having moved* to the city, you should research your job opportunities.
- Getting / Having gotten* around the city, you should use public transport like buses or trains.

D Rewrite the sentences with present participle clauses.

- Before they open the new park, they will finish the play area.
Before _____
- Because her father knows her love of nature, he often takes her to the suburbs on weekends.
Knowing _____
- They bought a house in the city after they had earned enough money.
Having _____
- After she moved to the suburbs, she bought a bicycle.
After _____

- Will he call you when he arrives in Hồ Chí Minh City?
Will he _____?
_____?
