LỜI NÓI ĐẦU

Tiếng Anh 8 – Global Success được Nhà xuất bản Giáo dục Việt Nam tổ chức biên soạn theo “Chương trình Giáo dục phổ thông: Chương trình môn Tiếng Anh” (từ lớp 3 đến lớp 12) ban hành theo Thông tư 32/2018/TT-BGDĐT ngày 26 tháng 12 năm 2018 của Bộ Giáo dục và Đào tạo, nối tiếp bộ sách tiếng Anh bậc tiểu học (Tiếng Anh 3, Tiếng Anh 4, Tiếng Anh 5) và tiếng Anh bậc trung học (Tiếng Anh 6, Tiếng Anh 7). Sách được biên soạn theo đường hướng giao tiếp, giúp học sinh sử dụng ngữ liệu (ngữ âm, từ vựng, ngữ pháp) để phát triển năng lực giao tiếp bằng tiếng Anh thông qua bốn kĩ năng nghe, nói, đọc, viết.

Tiếng Anh 8 – Global Success lấy hoạt động học là trung tâm, học sinh là chủ thể của quá trình dạy học, trong đó tâm lí lứa tuổi của học sinh trung học cơ sở, các đặc điểm văn hoá của Việt Nam, của các nước nói tiếng Anh, và của các nước trên thế giới được đặc biệt coi trọng.

Tiếng Anh 8 – Global Success được biên soạn xoay quanh bốn chủ điểm (Theme) gắn gũi với học sinh: Cộng đồng của chúng ta (Our Communities), Di sản của chúng ta (Our Heritage), Thế giới của chúng ta (Our World) và Tầm nhìn tương lai (Visions of the Future). Mỗi chủ điểm gồm ba đơn vị bài học (Unit) tương ứng với ba chủ đề (Topic). Sau mỗi chủ điểm là một bài ôn tập (Review), tập trung vào rèn luyện kiến thức ngôn ngữ và phát triển kĩ năng ngôn ngữ học sinh đã được học.

Tiếng Anh 8 – Global Success được biên soạn dựa trên cơ sở lí luận hiện đại về biên soạn sách giáo khoa ngoại ngữ trên thế giới, đặc biệt là những kinh nghiệm thực tiễn của việc dạy tiếng Anh cấp trung học cơ sở ở Việt Nam, với sự hợp tác chặt chẽ về chuyên môn và kĩ thuật của Tập đoàn xuất bản Giáo dục Pearson.

Nhóm tác giả rất mong nhận được những ý kiến đóng góp của các em học sinh, các nhà giáo, các bậc phụ huynh và đông đảo bạn đọc quan tâm để sách được hoàn thiện hơn.

Stilt houses

Stilt houses are popular among different ethnic minority groups, from the Thai in the Northern Highlands to the Khmer in the Mekong Delta. The houses come in different sizes and styles, and show the traditional culture of their owners.

Stilt houses are made from natural materials like wood, bamboo, and leaves. They stand on strong posts, about two or three metres above the ground. This allows them to keep people safe from wild animals. People climb a seven- or nine-step staircase to enter the house. The most important place in the house is the kitchen. It has an open fire in the middle of the house. It is the place for family gatherings and receiving guests.

The stilt houses of the Tay and Nung usually overlook a field. The stilt houses of the Thai, however, face mountains or a forest. The Bahnar and Ede have a communal house (called a *Rong* house) as the heart of their village. These communal houses are the largest and tallest ones in the village.

The atmosphere becomes loud with the sound of drums and cheers of festival goers.

At noon, there is a village party at the communal house for the elders. Each family also holds a home party. We cook traditional dishes like sticky rice and steamed chicken. Sometimes, we include food that children love, such as *bun cha* or even pizzas!

Teachers will no longer need to call students' names to find out who is absent. This will make more time for activities!

Schools can also use these biometric applications for students who borrow books and equipment. Even more amazing, teachers can even use the eye-tracking applications to check students' understanding of a lesson and to motivate students to learn.

Nowadays humans are still wondering what planets in outer space might support life.

Scientists say planets need to meet three main conditions to support life. Firstly, they must have **liquid** water, so their temperature must not be too high or too low. Secondly, the planets need to have the correct amount of air so that they can hold an atmosphere around. Finally, their size is also important. If a planet is too small, its **gravity** is not strong enough to hold an enough amount of air. If it is too big, its gravity will be so strong that it will hold too much air.

Scientists are using space telescopes to find **habitable** planets. According to them, Mars is one of the most **promising** planets for life in our solar system. It is a planet like Earth. Its days last for 24.5 hours and its seasons are similar to Earth's. Although scientists have not found actual water on Mars, there seems to be **traces** of it on the planet's surface. However, the climate on Mars is unsuitable for human life because it is too cold and Mars lacks oxygen to support human life.

| 1. liquid | a. suitable for people to live in |
| 2. gravity | b. marks, objects, or signs that show that somebody or something existed |
| 3. habitable | c. in the form of a substance that flows freely and is not a solid or a gas |

| | |
|--------------|--|
| 4. promising | d. the force that causes something to fall to the ground |
| 5. traces | e. showing signs of being good or successful |

3 Read the text again and answer the following questions.

1. What are humans still wondering nowadays?
2. Why does a habitable planet need to have the correct amount of air?
3. What happens if a planet is too small?
4. How long does a day on Mars last?
5. Why can we not live on Mars?

5. The planet must have enough oxygen in the air.

Can you add other conditions for a habitable planet?

5 Work in groups. Take turns to talk about the conditions you think are required for a planet to support human life. Use the information in 4 and your own ideas.
